52 Radnor road, Luton, Bedfordshire LU4 0UQ

PERSONAL STATEMENT

I am a final year student looking to seek work in a sector that I have passion in, coding has been a big part of my life ever since I discovered it during sixth form and therefore, I want to be able to continue it in the future. Not only have my coding and programming skills improved but I am also a curious and creative person and have many artistic hobbies.

My time in clubs and societies have allowed me to build relationships quickly and become a more friendly and approachable person.

WORK HISTORY

LEWSEY CHILDRENS CENTRE NURSERY | LUTON, BEDFORDSHIRE

Nursery Assistant

07/2018 – 07/2018

I worked briefly in a nursery for work experience, but my time there has taught me a lot.

- Monitored interactions within groups and encouraged socialisation and cooperation between children.
- Helped manage the behaviour of children and supported their development.
- The role enabled me to be more friendly and engage with children, creating opportunities to be confident around a variety of age groups.
- The experience improved team building skills and communication skills through various activities done with the children.

QUEEN MARY UNIVERSITY OF LONDON | MILE END, LONDON

Demonstrator

10/2023 – PRESENT

I am currently working as a demonstrator at Queen Mary University for a software engineering module, this role requires me to:

- Prepare ahead of labs and familiarise myself with content being taught.

SKILLS

- CSS
- HTML
- Some PHP
- C
- Java
- TypeScript
- Python
- React Native
- MySQL

EDUCATION

Queen Mary University of London

Software engineering for Business

(2021-)

On the way to achieve a first class

Luton Sixth Form College

(2019-2021)

Achieved A in Maths and Computer Science and B in Physics. Scored A* in my EPQ.

Chalk Hills Academy

(2015-2019)

Achieved a 9/8 in science, an 8 in maths, a 5 in English Language and a 6 in English literature.

REFERENCES

References are available on request.

- Help students with work they are struggling with them and guide them through the labs.
- Explain concepts of software engineering in an easy and understandable way.

PROJECTS

During my time learning coding I have created many projects and applications, these include:

- A fitness application that created for my EPQ to help others lose weight in a healthy environment.
- A study application focused on physics students to help study for their exams.
- A choose your own adventure story using java using what concepts learnt like object-oriented principles.
- A portfolio website (Available on the links section).
- A mobile app for pet sitters and pet finders to get the best care for pets.

HOBBIES AND INTERESTS

Enjoy drawing and painting and like to post my artworks online to gain critique and advice from online art communities, the feedback received help improve my drawing skills. Art allows me to express my creativity and is a way to destress. Also have taken up knitting recently and have made some creations. Due to working with logic and maths daily for university it's always refreshing to nurture my creative side.
